

ASSETZERO

Intelligence-Driven Attack
Surface Management

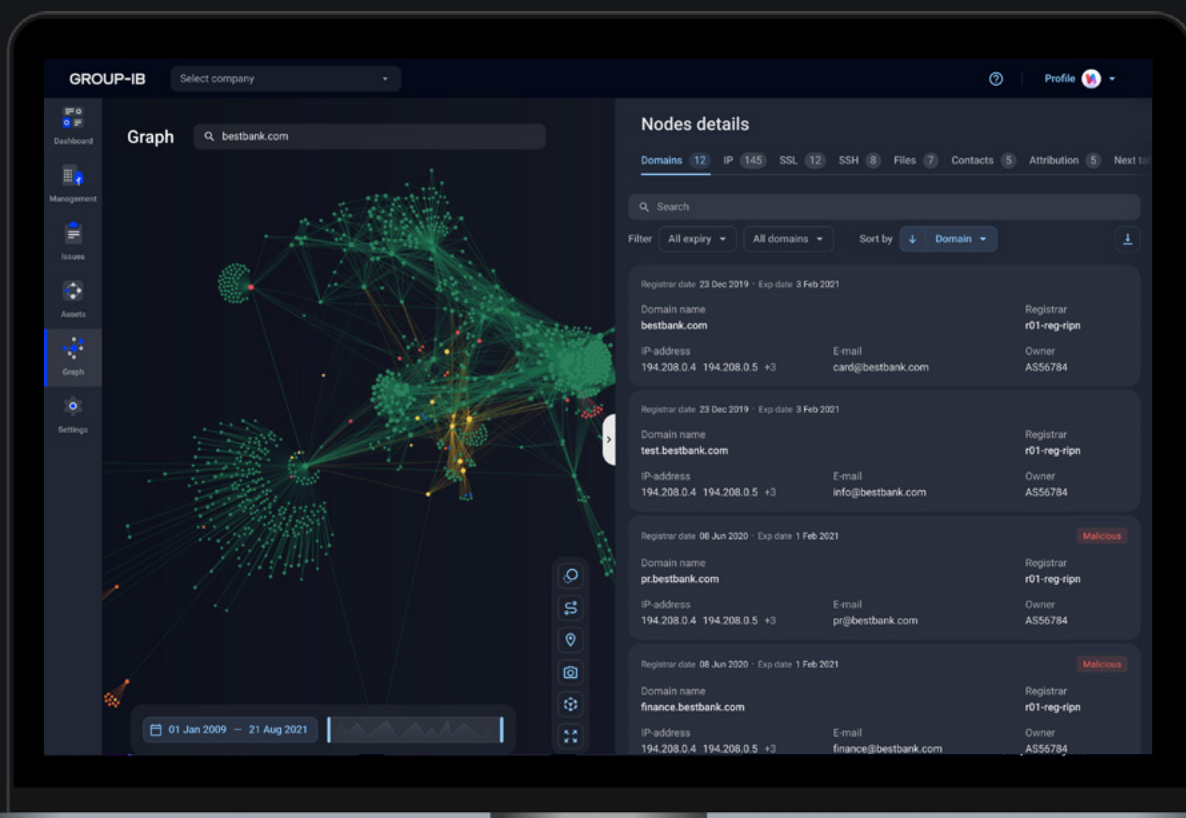

Discover your organizational attack surface

and receive actionable insights to improve security posture

Very few corporate breaches involve zero-day vulnerabilities or advanced exploits. Instead, the majority of breaches result from run of the mill perimeter-based vulnerabilities, such as unpatched servers, misconfigured databases, and shadow IT assets that aren't managed at all.

AssetZero is a comprehensive, intelligence-driven SaaS solution designed to discover, assess, and help manage your organization's attack surface. The tool provides full visibility of all Internet-facing assets, identifies vulnerabilities, and prioritizes remediation tasks to strengthen security.

AssetZero: Key Features & Benefits

Complete Visibility

AssetZero looks beyond the IPv4 space to identify and index all IT assets, including shadow IT.

Frictionless Deployment

AssetZero is an agentless, cloud-based SaaS solution. No new instances required.

Continuous Discovery

AssetZero continuously tracks all Internet-facing assets, whether on-prem or in the cloud.

Contextualized Insights

All indexed assets are assigned a quantitative risk level to help prioritize action items.

Dark Web Intelligence

AssetZero is the only EASM solution enriched with data points from bot-nets, malware and the dark web.

Stronger Security Posture

Managing the external attack surface helps prevent avoidable breaches and improves security.

Clearly understand your highest security risks

in real time to prevent breaches

DISCOVER AND TRACK YOUR
EXTERNAL-FACING IT ASSETS

IDENTIFY SHADOW IT AND
MISCONFIGURATIONS

ASSESS ATTACK SURFACE
WITH INTELLIGENCE FROM
THE DARK WEB

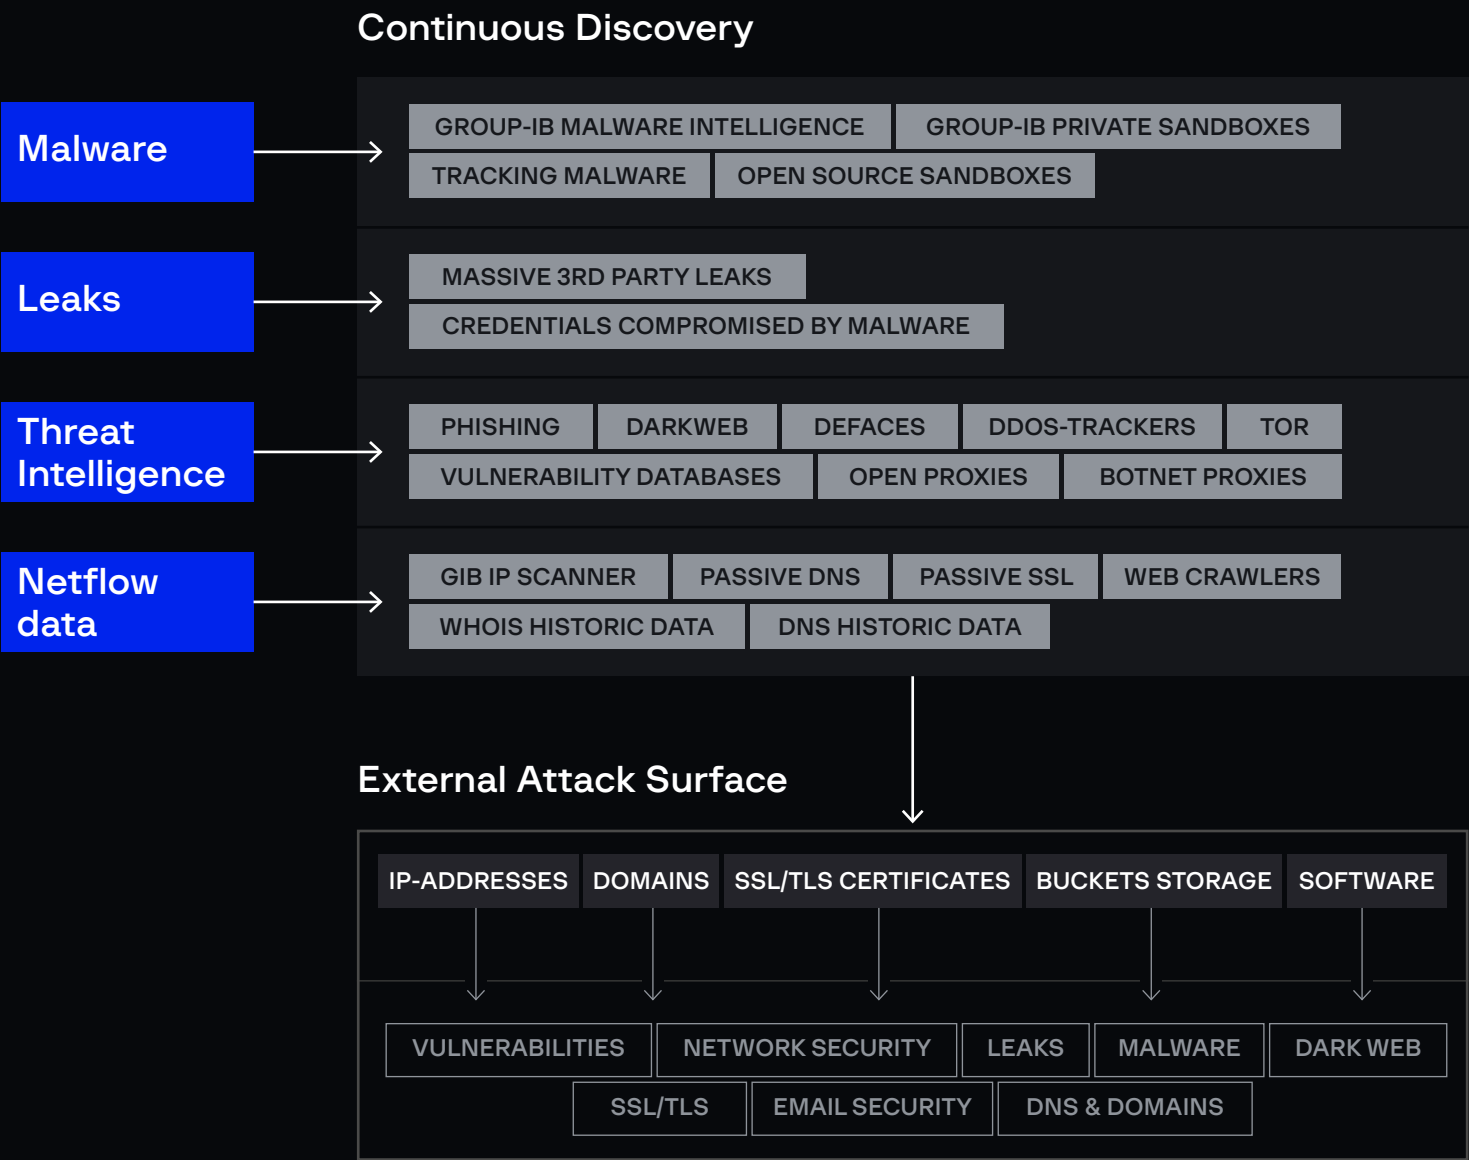

RECEIVE ACTIONABLE INSIGHTS
TO IMPROVE SECURITY

AssetZero goes above and beyond existing processes & products

AssetZero surpasses existing processes & external attack surface management (EASM) solutions with patented technologies and advanced threat intelligence.

Unique Enrichment

Gain direct insights from Group-IB's advanced threat intelligence across 8 asset categories.

Continuous Discovery

Maintain visibility on your attack surface and its vulnerabilities with continuously updated data.

Actionable Insights

Receive alerts on action items, track progress over time, and generate reports to demonstrate results.

Illuminate all of your blind spots

with Group-IB's AssetZero

Indexed Assets

An comprehensive look at all of your external IT assets

Identified Issues

A full list of issues, displayed by asset category and risk level

Remediation & Risk Scoring

A quantitative risk score that prioritizes improvements

Since 2003, Group-IB has been at the forefront of cyber security technology, DFIR, security assessment and consulting, providing tools and insights to prevent breaches.

18 years

Of hands-on experience

70,000+

Hours of incident response

1,300+

Successful investigations worldwide
